**CRUISES
ICELAND AND GREENLAND**

BROCHURE PREVIEW

WELCOME ONBOARD!

Discover Our Iceland and Greenland

With an ice-strengthened hull and relatively small vessel size, the OCEAN DIAMOND and the SEAVENTURE offer adventurous sea voyages in Arctic waters beyond the boundaries of a conventional cruise itinerary. Join us on a voyage of discovery as we share the unique nature, geology, culture and history of these big North Atlantic islands.

Discover Our Secret Places

Our itineraries include stops that offer excursions to places that are normally very difficult to reach and visited by only the lucky few each year. We also offer pre- and post-cruise experiences in Iceland at www.icelandprocruises.com

Discover Our Enthusiasm and Expertise

Members of our English-speaking Expedition Team all have one thing in common: to show you the most beautiful corners of the destinations they love and know from the inside out.

Focus Iceland – Discover the local way of life

The sea voyages of Iceland ProCruises are primarily focused on the destination. With the Expedition Team, you have the opportunity to experience Iceland with real locals. Listen to opera singer Arndis Halla and her breathtaking singing of Icelandic songs or taste local craft beers at our beer tasting.

Discover the “Green Initiatives”

It is extremely important to us to be good stewards of the environment. As our next season progresses, look for news from us on more Green Initiatives. Some practices include:

- Better water conservation practices
- Reducing and eliminating single use plastics
- Using biodegradable shampoos and cleaning products

Discover our shore excursions

All of our staff members have logged many years of experience as tour guides and/or lecturers. You can look forward to them sharing their passion and expertise with you both onboard and during our many exciting shore excursions and landings.

OCEAN DIAMOND in Djupivogur

ENJOY THE BREATHTAKING ISLAND OF FIRE AND ICE ONBOARD THE OCEAN DIAMOND

Thanks to two stabilizers that significantly reduce roll and an ice-strengthened hull, the OCEAN DIAMOND is the ideal ship for exploring the waters around Iceland.

Due to its compact size, the OCEAN DIAMOND can enter fjords and bays too shallow for larger vessels. The ship features a range of modern onboard amenities and is staffed with outstanding officers and crew, as well as bilingual expedition leaders and guides. The ship's Zodiacs are available for tender service and Zodiac tours. After a busy day of exploration, passengers can browse books in the well-stocked library, savor a health or beauty treatment in the small onboard Spa, or enjoy views of the spectacular arctic scenery from the Observation Lounge.

We look forward to welcoming you onboard the OCEAN DIAMOND.

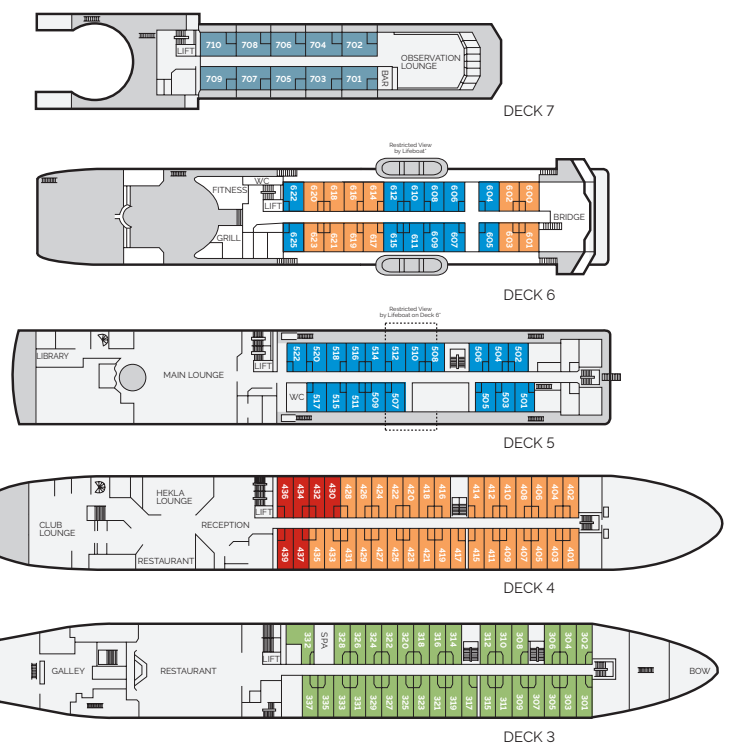

Ship data

Flag:	Bahamas
Year of construction/renovation:	1974/1986/2018 /2021
Crew:	106
Guests Max:	210
Ice Class:	1D
Length:	124 meters (406 ft)
Width:	16 meters (52 ft)

- A Balcony Suite: around 30 m²/323 square feet in size with a big balcony
- D Outside Cabin: around 19 m²/205 square feet in size with picture window
- O Outside Cabin: around 19 m²/205 square feet in size with obstructed view
- P Outside Cabin: around 19 m²/205 square feet in size with portholes
- T Triple Cabin: around 19 m²/205 square feet in size with picture window

SEAVENTURE

ENJOY THE BREATHTAKING NATURE OF GREENLAND ONBOARD THE SEAVENTURE

The SEAVENTURE was specifically designed for extraordinary moments. Thanks to its special construction, the small ship is incredibly agile and manoeuvrable making a change of course effortless for a rare wildlife sighting.

In addition, the MS SEAVENTURE has been assigned the highest ice class for passenger ships. A greater density of steel plates in the hull and a massive stem are just two of the many elements that allow the expedition ship to glide safely through the sparkling arctic waters.

Our twelve Zodiacs are ready and waiting to get you up close and personal with the most breathtaking natural wonders of Greenland and explore otherwise inaccessible areas by land and sea.

We look forward to welcoming you onboard the SEAVENTURE.

Disko Bay

Disko Bay combines incredible iceberg scenery and Inuit hospitality. Along the eastern edge of the bay is Ilulissat, the third largest town in Greenland. The name means "iceberg" in Greenlandic, a reference to its location at the mouth of the iceberg-filled Ilulissat Ice Fjord, a UNESCO World Heritage Site since 2004.

The North

Nowhere else in the world do so many whales gather in one area as in the waters off northern Iceland. Observing whales in the wild is always a thrilling adventure. Also located in the north is the fascinating Lake Myvatn region. The schizophrenic landscape looks as if "heaven and hell" have clashed. One side of the lake features rugged volcanic remnants, while the other side is blessed with lush vegetation and varied bird life.

Photo: © Erwin Neo

The South

Some of the best known Icelandic sights are in this area including the Strokkur geyser, the geologically and historically interesting Thingvellir area, and the imposing Gullfoss waterfall. Also located here is the famous Eyjafjallajökull glacier, which covers the caldera of an ancient volcano. Vestmannaeyjar are a group of 14 volcanic islands, only one of which is inhabited – "Heimaey". Several spectacular waterfalls and dramatic sea cliffs are also found along the south shore.

Nuuk

Greenland's capital has around 16,000 inhabitants and combines Inuit traditions with modern European urbanity. It's also Greenland's oldest town, founded in 1728 by the Danish Norwegian missionary Hans Egede. The National Museum features 500-year-old mummies from Qilakitsoq, as well as other artifacts related to Greenland archaeology, history and art. The Katuaq Cultural Center in downtown Nuuk is the venue for concerts, exhibitions, cinema and local cuisine. The University of Greenland, the country's only university, is also located in Nuuk.

The East

The eastern coast of Iceland is dominated by narrow fjords, rugged mountains, remote homesteads and historic fishing villages. Here you find a variety of hiking trails that lead through untouched nature and spectacular scenery. Among the region's highlights are the town of Djúpivogur on the Berufjörður fjord and Jokulsarlon Glacier Lagoon, full of icebergs from Breidamerkurjökull glacier.
